

Università degli Studi dell'Insubria  
Dipartimento Biotecnologie e Scienze della Vita  
A.A. 2022/2023

**SUMMER SESSION**  
**SEMINARI DOTTORANDI XXXVIII CICLO**

Friday, June 30<sup>th</sup> 2023 - 14.00 -17.00 room 8 TM

**Dr.ssa Bartolone Letizia**

"Investigation on the biosynthesis of antimicrobial specialized metabolites in "rare" actinomycetes"

**Dr.ssa Elena Berno**

"Effect of PRODH in tumourigenesis and progression of lung cancer"

**Dr.ssa Camilla Bon**

"The medicinal leech *Hirudo verbana* as valid model for the study of tissue regeneration"

**Dr. Alberto Danieli**

" Plant root development: from cell to ecosystem level"

**Dr.ssa Davide Eleonora**

"The cAMP-dependent plant stress response"

**Dr.ssa Federica Macrì**

" Molecular mechanisms of vascular senescence and calcification"

**Dr.ssa Hajara Manahil**

"Deciphering the Role of Histone Modifications: An Approach to Study Aging Epigenome"

**Dr. Giulio Saroglia**

"Telemetric System for continuous monitoring of Abdominal Aortic Aneurysm"

**Dr. Marco Valentini**

"Quantitative anatomical comparison of microsurgical transcranial, transcranial transorbital, endoscopic transnasal and endoscopic transorbital approaches to the orbit and surrounding regions"

**Dr. Lorenzo Tonin**

"Exploring and exploiting microbial biodiversity in polar environments"
