

Università degli Studi dell'Insubria
Dipartimento Biotecnologie e Scienze della Vita

A.A. 2022/2023

SUMMER SESSION
SEMINARI DOTTORANDI XXXVII CICLO

Thursday, September 28th 2023 - 14.30 -17.30
room 3S – Seppilli building

Dr.ssa Caren Battaglia

"A synthetic microorganism for the biodegradation and upcycling of post-consumer PET"

Dr.ssa Sara Caramella

" A new strategy for enhancing the performance of Black Soldier Fly: a key player for a sustainable development"

Dr.ssa Marta Cavallini

"Characterisation of the genetic structure of chestnut tree varieties in the Lario region"

Dr. Alex Ceriani

" Biochar from invasive alien plant species' (IAPS) biomass for the remediation of contaminated soil"

Dr.ssa Maria Cristina Cervarolo

" Paclitaxel drug-coated balloon used for treatment of atherosclerotic stenosis in artery disease and for intimal hyperplasia in venous stenosis: study about the risk-benefit"

Università degli Studi dell'Insubria
Dipartimento Biotecnologie e Scienze della Vita

A.A. 2022/2023

AUTUMN SESSION
XXXVII CYCLE PhD STUDENTS' SEMINARS

Thursday, September 28th 2023 - 14.30 -17.30
room 3S – Seppilli building

Dr. Imam Hasan

"Microbiota at the water-fish interface: the case study of rainbow trout fed with a novel feed formulation containing *Tenebrio molitor* meal"

Dr. Luca Mellere

"Filamentous fungi for the valorization of lignocellulosic biomasses and the development of green processes"

Dr. Davide Miani

"Systems Biotechnology: D-amino acids production from renewable resources"

Dr.ssa Zoraide Motta

"Investigating the serine metabolism in human brain: the role in the etiopathogenesis of neuropsychiatric and neurodegenerative diseases"

Dr. Elias premi

"Reserch project for a new diagnostic and therapeutic pathway for patient with maculopathy: from genetics and biomarkers to telemedicine"
